The human senses of sight and hearing have a very high dynamic range. A human cannot perform these feats of perception at both extremes of the scale at the same time. The eyes take time to adjust to different light levels, and the dynamic range of the human eye in a given scene is actually quite limited due to optical glare. The instantaneous dynamic range of human audio perception is similarly ...

INTRODUCTION TO FREE ENERGY This is a boat. It is pushed along by the action of the wind on the sails. It can travel thousands of miles. If, like me, you consider free energy to be a source of power which you don't have to pay for, then this boat sails with free energy as you don't have to pay for the wind it arrives free, all on its own.
